

## **CONTENTS**

SUMMARY .....	Summary – 1
1. INTRODUCTION — PURPOSE AND BACKGROUND .....	1
1.1 Purpose.....	1
1.2 Background.....	2
1.3 Fish Passage and Keechelus Safety of Dams Construction.....	4
1.4 Project-wide Assessment .....	5
2. CURRENT PROJECT OPERATIONS .....	7
2.1 Yakima Project Description.....	7
2.2 Project Purposes.....	7
2.3 Water Supplies and Demands .....	8
2.4 Operational Considerations and Constraints (CCs) .....	10
2.5 Operating Seasons.....	11
3. STORAGE FACILITIES, OPERATIONS, AND DESCRIPTIONS .....	15
3.1 Overview.....	15
3.2 Snowpack, the “Sixth Reservoir” .....	16
3.3 Reservoir Storage Carryover .....	16
3.4 Keechelus Dam and Keechelus Lake.....	16
3.5 Kachess Dam and Kachess Lake .....	18
3.6 Cle Elum Dam and Cle Elum Lake .....	19
3.7 Bumping Lake Dam and Bumping Lake .....	20
3.8 Tieton Dam and Rimrock Lake .....	21
3.9 Clear Creek Dam and Clear Lake .....	22
4. FISHERIES AND FISH PASSAGE CONSIDERATIONS .....	25
4.1 Overview.....	25
4.2 Fish Species Affected by Yakima Storage Reservoirs .....	26
4.3 Passage Timing Requirements for Upper Basin Fish Species .....	28
4.4 Benefits of Providing Fish Passage .....	30
5. TRIBUTARY HABITAT CONDITIONS.....	31
5.1 Overview.....	31
5.2 Tributary Habitat Conditions by Reservoir .....	32

6. PASSAGE CONCEPTS .....	37
6.1 Introduction.....	37
6.2 Fish Passage Design Considerations.....	37
6.3 General Information.....	38
6.4 Upstream Fish Passage Concepts .....	39
6.5 Downstream Fish Passage Concepts.....	41
7. UPSTREAM AND DOWNSTREAM FISH PASSAGE OPTIONS BY DAM.....	47
7.1. Keechelus Dam – Upstream and Downstream Fish Passage Options .....	48
7.2 Kachess Dam – Upstream and Downstream Passage Options .....	50
7.3 Cle Elum Dam – Upstream and Downstream Passage Options .....	51
7.4 Bumping Lake Dam – Upstream and Downstream Passage Options.....	52
7.5 Tieton Dam – Upstream and Downstream Passage Options .....	54
8. DISCUSSION — INTEGRATING BIOLOGICAL, ENGINEERING, AND OPERATIONAL CONSIDERATIONS .....	57
8.1 Findings .....	57
8.2 Additional Issues and Concerns.....	60
9. CONCLUSIONS AND RECOMMENDATIONS .....	63
9.1 Conclusions.....	63
9.2 Recommendations.....	65
10. REFERENCES .....	67
10.1 Federal Agencies.....	67
10.2 Other Agencies and Entities .....	69
11. PARTICIPANTS .....	71
12. GLOSSARY, ACRONYMS, ABBREVIATIONS.....	73

## FIGURES

There are figures and maps in Appendix B; there are drawings and figures in Appendix D.

## TABLES

Table 2-1. Operating Periods and Seasons; Yakima River Basin 15-Month Operation Year.....	11
Table 2-2. Yakima River Basin 15-Month Operation Year.....	13
Table 3-1. System Storage Capacity and Average Annual Runoff on September 30 .....	15
Table 4-1. Fish Species Found in the Five Major Storage Reservoirs in the Yakima River basin.....	27

Table 4-2. Upstream Migration or Passage Timing for Adults .....	29
Table 4-3-a. Downstream Migration or Passage Timing for Juveniles .....	29
Table 4-3-b. Downstream Migration or Passage Timing for Kelts and Adults .....	29
Table 4-4. Composite Upstream Migration or Passage Timing .....	29
Table 4-5. Composite Downstream Migration or Passage .....	30
Table 5-1. Combined tributary stream length potentially accessible to anadromous salmonids upstream from five Yakima River basin storage dams if fish passage were provided .....	32
Table 5-2. Tributary streams to Keechelus Lake with habitat considered suitable for migratory salmonids .....	33
Table 5-3. Tributary streams to Kachess Lake, with habitat considered suitable for anadromous salmonids .....	34
Table 5-4. Tributary streams to Cle Elum Lake with habitat considered suitable for migratory salmonids .....	35
Table 5-5. Tributary streams to Bumping Lake with habitat considered suitable for migratory salmonids .....	36
Table 5-6. Tributary streams to Rimrock Lake with habitat considered suitable for migratory salmonids .....	36
Table 7-1. Estimated costs of upstream and downstream passage options.....	47
Table 8-1. Estimated cost of three upstream fish passage options .....	58
Table 8-2. Estimated costs of four downstream fish passage options .....	58
Table 8-3. Estimated construction costs per mile of combined upstream and downstream passage.....	58

## APPENDIXES

### APPENDIX A. AGREEMENTS

- “Mitigation Agreement Between the USDI Bureau of Reclamation and Washington Department of Fish and Wildlife Regarding Keechelus Dam Construction Issues Including Fish Passage” (4 April 2002).
- Washington Department of Fish and Wildlife, “Conditions number 57 through 59, Hydraulic Project Approval”; log number 00-E1998-01 (pursuant to RCW 77.55.100), Region 3 Office, Yakima, WA (17 April 2002)

### APPENDIX B. HABITAT ANALYSES AND DATA

### APPENDIX C. HABITAT PARAMETER MATRICES BY DAM

### APPENDIX D. PASSAGE ENGINEERING CONCEPTS

- Figures 1 through 6
- Drawings 1 through 23
